SUPPLEMENTAL AMENDMENT

TECHNOLOGY CENTER R370C

Sir:

This supplemental amendment is being submitted by the applicants in order to correct certain errors in the drawings which have come to the attention of the applicants subsequent to filing the amendment dated June 3, 2002.

In particular, a corrected drawing sheet of Figs. 9-11 is being submitted with the corrections circled in red. In Fig.10, the uniform inner diameter has been corrected so that the reference numeral 118 correctly corresponds to that which is recited within the specification.

This diameter had been previously numbered "115."

This supplemental amendment is not believed to unduly interfere with an Office

BEST AVAILABLE COPY

action being prepared in response to the previous reply, as this correction has no bearing on the rejection cited within the previous Office action.

Applicants will submit formal drawings upon the Examiner's indication of approval of the requested drawing corrections.

Entry of this amendment is respectfully requested.

Respectfully submitted,

Renée C. Lewald
